Acknowledgment

This book is the result of the collective efforts, ideas, and enthusiasm of many people who believe that learning about Computational Thinking and Artificial Intelligence can be joyful, creative, and accessible to every learner.

We would like to express our sincere gratitude to all the students and teachers who participated in our activities and workshops. Their curiosity, questions, unexpected solutions, and willingness to try, fail, rethink, and try again have continuously helped us improve these activities.

We also acknowledge the inspiration we have drawn from the wider community of educators, researchers and designers whose work has shaped our understanding of computational thinking, algorithms, problem-solving, data, and artificial intelligence. Wherever appropriate, sources and references have been included to acknowledge these contributions.

We would especially like to acknowledge our colleagues who contributed their time, ideas, feedback, and expertise to the writing and development of this book. Their contributions, discussions, and support played an important role in bringing this together.

Our sincere thanks to:

Principal Coordinator, Centre for Creative Learning

Prof. Manish Jain
Teaching Professor, IIT Gandhinagar

Content, Centre for Creative Learning

Astha Jain
Chris John
Imroz Khan
Jay Thakkar
Neha Garg
Shilpa Bansal

Illustrations, Centre for Creative Learning

Meenakshy B.
Prarthana Neema
Shivendra Kumar
Sonu Mehta

We hope this book inspires learners not only to learn about computational thinking and artificial intelligence, but also to think, question, create, experiment, and enjoy the process of discovering how things work.

Table of Content

COMPUTATIONAL THINKING OVER MAZE PUZZLE(S)....1
Number Maze....2
Hopping on Number Maze and Programming....6
Chess Maze and Abstraction....25
Colour Maze and Searching....46
COMPUTATIONAL THINKING OVER PUZZLE(S)....64
Building Puzzle....65
Three Jug Problem....76
LANGUAGE OF COMPUTER....88
Image by Number....89
Guess the Birthdate Trick....99
Count on Fingers....104
Binary Punch Cards....114
Logical Puzzle Punch Cards....119
Measure your Height....126
ALGORITHMS AND COMPUTATIONAL THINKING....134
Searching for the Fake Weight....135
Sorting with a Weighing balance....141
Sorting Networks....147
Domino Computer....151
LEARNING AI THROUGH EXPERIENCE....163
Project 1: Matchboxes that can Learn a Game!!!....164
Project 2: Data is Beautiful....168
Project 3: Classification and AI Methods....173
Project 4: Play Chess against AI....177
Project 5: Image Identification with Teachable Machine Tool....183
Project 6: Art, AI and Ethical Implications....192
COMPUTATIONAL THINKING OVER ENCRYPTION....194
Coin Flip Magic....195
Caesar Cipher....199
Disc Enigma....205
Rotating Grid Cipher....215
OTHER ACTIVITIES....225
Perfect Squares....226
Golomb Rulers - 1....232
Golomb Rulers - 2....237
String Art....245

COMPUTATIONAL THINKING OVER MAZE PUZZLE(S)
